DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

1) Claim 1, lines 5, the phrase "will only transmit a signal mainly if and as long as" is indefinite and should be defined with better clarity, since use of the terms "only", "mainly if", and "as long as" are contradictory with regards to action taken by the transmitter.

2) Claim 6, line 2, the "and/or" is indefinite and should be defined with greater specificity.

ART REJECTION:

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2612

4. Claims 1-3,5-6, and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Straub(6,728,605).

-- In considering claim 1, the claimed subject matter that is met by Straub includes:

1) the switching device, speedometer connected to the switching device and as well transmitter connected to the switching device so as to only transmit a signal mainly if and as long as the speed measured by the speedometer is higher than a predetermined limiting value is met by the speedometer(not shown) which is connected to the vehicle cruise control system;

2) the switching device is met by the controller(12) which is connected to the speedometer via cruise control system, and which includes some form of transmission means(not shown) which sends a control signal to indicate when a measured vehicle speed is higher than a predetermined limited value(see: column 8, lines 1 et seq).

-- With regards to claim 2, the inputting means is met by the vehicle cruise control interface(18).

-- With regards to claim 3, the GPS position finding device is met by the GPS receiver(14).

-- With regards to claim 5, the transmitted signal comprising an acoustic signal is met by the speaker(25).

-- With regards to claim 6, the signal comprising light is met by the display(23).

-- Claim 8 recites subject matter that is met as discussed in claim 1 above.

Allowable Subject Matter

5. Claims 4 and 7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
